

Turnitin: controlling where student work is submitted to

When creating a new assignment in Turnitin you can elect to not submit the student works to Turnitin's own database of works, (the 'standard paper repository'). For example, you may wish to do this for formative use of Turnitin or where student work may contain confidential information.

You can change the submission settings for a new assignment or edit them for an existing assignment by selecting the 'more options' link on the assignment setup page.

New Assignment

 **general**

assignment title *
 

point value
 

 **dates**

start date *
 
at :

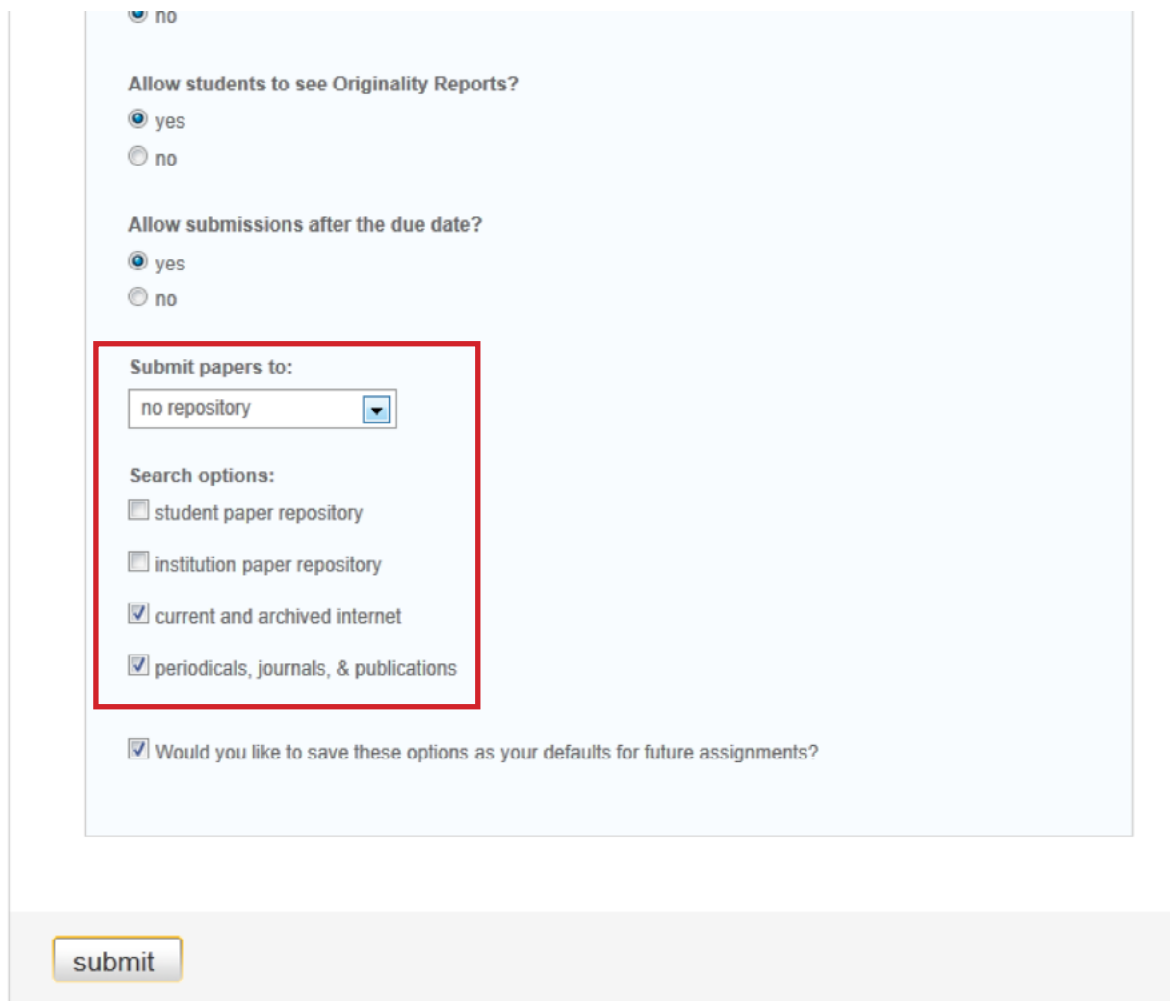

due date *
 
at :

post date *
 
at :

 [more options](#)

Once the 'more options' items are displayed you will find the submission options at the bottom of the page. Select the required option from the 'Submit papers to:' control, select 'no repository' if you wish to prevent student work from being stored in Turnitin's 'standard paper repository'.

Note that student work will not be compared to other works in the Turnitin 'standard paper repository' if you have selected not to submit the work to that repository.

The screenshot shows a form with several sections. At the top, there is a radio button for 'no'. Below that, the section 'Allow students to see Originality Reports?' has radio buttons for 'yes' (selected) and 'no'. The next section, 'Allow submissions after the due date?', also has radio buttons for 'yes' (selected) and 'no'. A red rectangular box highlights the 'Submit papers to:' dropdown menu, which is currently set to 'no repository'. Below this, the 'Search options:' section contains four checkboxes: 'student paper repository' (unchecked), 'institution paper repository' (unchecked), 'current and archived internet' (checked), and 'periodicals, journals, & publications' (checked). At the bottom of the form, there is a checked checkbox for 'Would you like to save these options as your defaults for future assignments?'. A 'submit' button is located at the bottom left of the form area.
